INFORMATION FOR VISUAL FIELDS TEST

Directions to the department

From the concourse go up the stairs/lift and follow the signs to all departments. Continue along the corridor, passing Pharmacy and X-ray until you reach B block lifts. Take a lift to the fourth floor (B4). Proceed along A block corridor, turning right at Clinical Neurophysiology. Map on reverse.

About your test

One of two tests will usually be performed:

1. The arc test involves looking at one object and responding to a second, moving object to draw a map of your vision. An eye patch is used so each eye can be mapped separately.
2. The Humphries test involves placing your head on a chin rest whilst looking into a box. An eye patch is used so each eye can be mapped separately. You will be asked to press a button every time you see lights flashing.

What to bring with you

If you wear spectacles, please bring them with you.

Please continue with your usual medication.

Please bring change for the pay and display parking system. The multi-storey car park is a suitable place to park. Outside the concourse entrance there is a car park for the disabled. During busy periods, please allow additional time for parking.

If you require an ambulance for transport, please contact your GP as soon as possible as several days notice is required.
