If your child completes the vaccination schedule they will be protected against:

- | | | | |
|---------------------------------------|--|-----------------------------------|--|
| • Diphtheria | | • Meningococcal meningitis | |
| • Tetanus | | • Rotavirus | |
| • Whooping cough | | • Measles | |
| • Polio | | • Mumps | |
| • Haemophilus influenza type B | | • Rubella | |
| • Pneumococcal disease | | • Seasonal influenza | |

Immunisation is a simple and safe way to protect your children against serious diseases.

All vaccinations given as part of your child's immunisation schedule **are free**.

Immunisation is a vital way to keep children healthy and give them the **best start in life**.

Around 9 out of 10 infants in Cardiff and the Vale of Glamorgan have had all of their immunisations. **However, a few have not and these children are at higher risk of serious illness.** If you would like to find out more details about the childhood vaccination programme, please speak to your Health Visitor, Practice Nurse or GP.
